

Particulars:

Length overall	22'-0"	Sail area: Cutter/Catboat	603/560 sq. ft.
Length designed waterline	20'-0"	Sail area-displacement ratio:	22.64/21.02
Beam	9'-8"	Wetted Surface (W.S.)	211 sq. ft.
Draft	4'-6"	Sail Area/W.S. Ratio	2.86/2.65
Freeboard: Forward	4'-3 1/4"	Prismatic coefficient	.573
Least	2'-7 3/8"	Pounds per inch immersion	633
Aft	3'-0"	Entrance half-angle	28°
Displacement, cruising trim	8,800 lbs.	Water tankage	55 Gals.
Displacement-length ratio	491	Fuel tankage	27 Gals.
Ballast	2,200 lbs.	Headroom	6'-2"
Ballast ratio	25%	GM	3'

22' Cruising Catboat or Cutter

Design number 128
1975 & 1988

An expanded version of our popular 17' Cruising Catboat, this larger sister has almost twice the room in her proportionately larger hull. She's the answer for those who are in love with the 17' Catboat, but who'd like something "just a little bigger". She has 6'-2" standing headroom and the practicality of the traditional catboat hull about her.

The catboat and topsail cutter rigs give the boat some interesting options. The topsail cutter is the designer's favorite, with the variety of sails making her versatile and easily handled in a variety of conditions with a high fun quotient.

Her heavy displacement gives a great comfort to being aboard, and her hull form with the ballast on the keel give her great stability for carrying sail in a strong breeze. She has very high sail area to wetted surface and displacement ratios to assure good sailing performance in light airs too.
